

# Return of Legacy Materials

## General Information

12 May 2025

Dear ASPs,

Recently, several manufacturers have stopped producing maintenance parts for legacy substation assets. These include fibreglass KE substation housings, KE low-voltage distributor panels, and H boards used in chamber substations.

### **Key Change:**

Ausgrid's maintenance team may request the return of additional decommissioned assets for use in future maintenance activities.

### **What This Means for You:**

Ausgrid may require additional items to be returned during decommissioning projects.

### **Important Notes:**

- Ausgrid's maintenance team will routinely review upcoming decommissioning projects to identify any parts requiring return.
- The maintenance team will coordinate with the relevant Network Connection Coordinator to arrange a suitable time for collection or drop-off.
- Your Network Connection Coordinator will keep you informed throughout the return process.
- All existing ASP return processes remain unchanged.

If you have any questions or concerns about this change, please don't hesitate to contact your Ausgrid representative.

Thank you for your cooperation and continued commitment to safety and efficiency in our network operations.
