? /	Quick Asset Search and Zoom*

*Displays a popup to quickly search for and zoom to an object in the network model in the perspective, plan, or profile views. If you have a different view open (or none of the above views open), Neara will open and zoom to the selected object in the perspective view.

Note: Refer to the Control the 3D Views to learn how to move around the 3D ‘Perspective’ view, and the 3D Assembly libraries in Neara using your mouse.
