

# ASP Safety Alert

## ASP Compliance and Practices

**Alert Number: SA16\_17**

**7<sup>th</sup> December 2017**

**Subject: Safety Reminder in the Workplace.**

### Key Messages

**Plan ahead, put safety first and remain focus at all times**

In recent times Ausgrid have recorded an alarming increase in the number of Safety incidents on the Ausgrid network which could have lead to a serious injury or death. All cases could have easily been prevented.

As we approach the end of year, record high activity is being experienced on the Ausgrid network and ASP's are reminded to remain focus as the end of year approaches.

Where performing works on Ausgrid's network, it is extremely important that you plan ahead and put safety first at all times.

Incidents have significant impacts to all parties involved ranging from sociological impacts, injury, permeant disability, death, financial impacts, suspension of individual and company Authorisations.

Ausgrid request that all ASP's be a leader and make safety a part of what you do, this will reduce the potential of an incident and help prevent associated impacts to your company and its employees.

Company directors are encouraged to discuss the recent trend in safety incidents within the workplace and reinforce the importance of making safety number one.
